

# Fail2ban

## Instalación de Fail2ban

Eliminar IP de la lista de IP Baneadas. Para ello ejecutamos el siguiente comando:

```
fail2ban-client -i
```

Cuando lo ejecutemos, aparecerá el prompt de la consola de comandos de fail2ban

```
root@mail: ~# fail2ban-client -i
Fail2Ban v0.9.6 reads log file that contains password failure report
and bans the corresponding IP addresses using firewall rules.

fail2ban>
```

En la consola, ejecutamos status y el jail que queremos desbloquear, o del que queremos averiguar las IP bloqueadas

```
fail2ban> status sshd
Status for the jail: sshd
|- Filter
|   |- Currently failed: 0
|   |- Total failed: 3
|   `-- File list: /var/log/auth.log
`- Actions
    |- Currently banned: 0
    |- Total banned: 1
    `-- Banned IP list: 1.2.3.4
```

```
set sshd unbanip 1.2.3.4
```

Devolverá 1.2.3.4

Para salir de la línea de comando, teclearemos exit.
